Wise PDF Content Split

Wise PDF Content Split is a convenient and speedy application focusing on solving out the problems of splitting Acrobat PDF files into smaller pdf files based on location, contents or text information of the original files. With this tiny application, the composite PDF documents, such as invoices, reports or payroll files, can be split into separated files by setting keywords, such as invoice number, account number or employees' names. A series of rules for splitting are available to you, and you can even set a rule at your option.

Wise PDF Content Split is designed to split PDF files into smaller ones according to the location, contents or text information of the original files. Splitting by keywords (invoice number, account number, etc) is a effective way for you to deal with your PDF files easily as you like, which raises your wording efficiency and saves your money.

With Wise PDF Content Splitter, you can export the splitting rule you set this time after you select or edit a rule, and import that rule to split your PDF files next time for avoiding wasting your time.

Note: This product has a free trial version, all features in this document are useful for you. There is no any watermark in your merging pdf files if you use the registered version.
