```
PPCPCMD.exe <Source PDF> <Destination PDF> <Rectangles>

Parameters:
  <Source PDF>        Source PDF file.
  <Output PDF>        Specifies the name for the output file.
  <Rectangles>        Specifies the rectangles to crop;
                      The <Rectangles> can be like this:
                      -R<pages>=(Crop Rectangles)
                      <Rectangles> Parameter:
                        <pages>: *: means all pages
                                 1-10,20,23 : means from page 1 to page
                                 10,20 and 23 page and so on...
                        (Crop Rectangles): should looks like:
                                 ([1,0.5,5.3,10],[1,5.5,-0.2,-0.1])
                                 which means pages will be cropped
                                 based on: two rectangles: (left: 1
                                 Inch, top: 0.5 Inch, width: 5.3 Inch,
                                 height: 10 Inch) and (left: 1 Inch,
                                 top: 5.5 Inch, right: 0.2 Inch to the
                                 right edge of the PDF page, bottom:0.1
                                 Inch to the bottom edge of the PDF
                                 page)
Example: "-R*=([1.5,1.5,5,5])": meams all page in the source
file will be cropt by a rectangle (left:1.5 Inch, top:1.5 Inch,
width:5 Inch, height:5 Inch)

Examples 1:
