                  Lines position; set cut page order The <Lines> can be
                  like this:
                  -L<pages>=(Horizaontal lines),(Vertical lines):<Page
                  Order>
                  <Lines> Parameter:
                    <pages>: means all pages 1-10,20,23 : means from
                            page 1 to page 10 and so on...
                  (Horizaontal lines),(Vertical lines) should looks
                  like: (10,20,30),(50) which means pages will be cut
                          based on: three horizaontal lines
                          (position:10%,20%,30%) and one vertical line
                          (in the middle of the page)
                  <Page Order>: should be:F or L or H or V
                                F: First-Last, L:Last-First, H:
                                Horizontal V: Vertical.
                  Example: "-L*=(),(50):F": meams all page in the source
                          file will be cut into half based on a vertical
                          line and the output file''s page order will be
                          "First-Last"

Return code:
0: Success
2: Input PDF not found
3: The parameters are invalid.
4: Load PDF error
5: Password error
6: Nonsupport security
7: Failed to save the ouput file

Example:
PPCCMD "C:\input.pdf" "C:\output.pdf" "-L*=(),(50):F"
PPCCMD "C:\input.pdf" "C:\output.pdf" "-L*=(50),():L"
PPCCMD "C:\input.pdf" "C:\output.pdf" "-L1-
10,33=(10,20),(20,60,80):H"
PPCCMD "C:\input.pdf" "C:\output.pdf" "-L*=(),(50):V" "-L9-
15,32=(50),():V"
```
